

REPUBLIC OF INDONESIA

**LIST OF MEDIUM-TERM PLANNED
EXTERNAL LOANS 2015-2019
~ 2016 REVISION ~**

- 1st Book -

**Ministry of National Development Planning/
National Development Planning Agency**

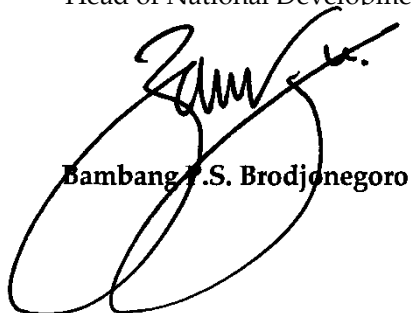

Foreword

The List of Medium-Term Planned External Loans or *Daftar Rencana Pinjaman Luar Negeri Jangka Menengah (DRPLN-JM) 2015-2019* has been published in early 2015. It consisted of 29 programs and 116 projects with the proposed loan as of USD 39.87 billion. In line with the fiscal condition of the state, in the second semester of 2016 the need for the external loans is increasing. Therefore, the Government prepared some additional projects to be funded by external loans, which proposed by the ministries/ agencies, local government and state-owned enterprises (SOEs). According to the Government Regulation No. 10 of 2011 on Procedures for Procurement of External Loan and Grant Receipt, the Government may revise the DRPLN-JM. So that, the additional projects is listed in DRPLN-JM 2015-2019 Revision, including the projects that being redesigned. While the projects that has been transferred to another source of fund and which has been signed it's loan agreement, were excluded from the DRPLN-JM 2015-2019 Revision.

DRPLN-JM 2015-2019 Revision consists of 37 programs and 118 projects, with USD 42,273.4 billion loan value. Most of those projects are for infrastructure sector (87%), while the rest are for non-infrastructure sector (13%). The infrastructure sector primarily will be used to finance the development of railway facilities (17%), dam and irrigation (14%), roads and highways (12%), water supply and sanitation (11%), slum alleviation (9%), electricity (10%), sea transportation (5%), and bulk water and flood management (4%). While for non-infrastructure sector will be utilized to support health sector (5%), agriculture (3%), and higher education development (2%).

DRPLN-JM 2015-2019 Revision was established by the Decree of the Minister of National Development Planning/ National Development Planning Agency No.KEP.54/M.PPN/HK/09/2016. DRPLN-JM 2015-2019 Revision is expected become a guideline for line ministries, agencies, local governments, and SOEs in preparing further process and as a reference for potential development partners in preparing their cooperation plans with the Government of Indonesia.

Minister for National Development Planning/
Head of National Development Agency,

Bambang F.S. Brodjonegoro

Chapter 1

INTRODUCTION

The Government of Indonesia has a commitment to achieve the targets of the Medium-Term National Development Plan or *Rencana Pembangunan Jangka Menengah Nasional (RPJMN)* 2015-2019. To achieve those targets requires enormous number of fund, while the fund that can be provided through the State Budget or *Anggaran Pendapatan Belanja Negara (APBN)* is very limited. Therefore, the support from external financing is needed including external project loans.

To utilize the external loans as the source of development financing, the Government prepare the proposal for the projects to be funded by external loans. The proposals which were submitted by the ministries/agencies/local governments and/or SOEs, are compiled becomes The List of Medium-Term Planned External Loans or *Daftar Rencana Pinjaman Luar Negeri Jangka Menengah (DRPLN-JM)*. DRPLN-JM is a medium-term planning document of external loans for the same period as the RPJMN.

DRPLN-JM 2015-2019 has been published in 2015. Referring to the Government Regulation No. 10 of 2011, DRPLN-JM is possible to be revised as needed. Hence the fiscal condition of the state in 2016 which caused increasing of the need for additional financing, then the government revised the DRPLN-JM 2015-2019. The DRPLN-JM 2015-2019 Revision covers of the new external loan projects including the projects that being redesigned. Therefore, the DRPLN-JM 2015-2019 Revision contains 37 programs and 118 projects, which consist of infrastructure projects (87%) and non-infrastructure projects (13%).

The DRPLN-JM 2015-2019 Revision contains 27 new external loan projects and 1 redesigned external loan project. Those projects has been through the assessment process as well as other projects in the DRPLN-JM 2015-2019. The projects that previously stated in DRPLN-JM 2015-2019 which was published in 2015, are re-listed in the DRPLN-JM 2015-2019 Revision, except those which has been signed it's loan agreement and the projects that were transferred to other source of fund. Some of the new external loan projects are incorporated in program that already stated in the DRPLN-JM 2015-2019, so that the ceiling of the program is increased. On the other hand, there are also some new projects that formed the new program in the DRPLN-JM 2015-2019 Revision.

DRPLN-JM 2015-2019 Revision is presented in Program Based Approach (PBA) format. Through this approach, a group of external loan projects which has similar outcomes is compiled into an external loan program. A program may consist of external loan projects from one or more executing agencies. The PBA is aimed to increase the effectiveness of external loans utilization by means of more focus on the achievement

of outcomes of the projects. Through the PBA implementation, we could easily identify the links between the utilization of external loans and the RPJMN's objectives.

In this context, some changes of the projects within a program are allowed, among others changes in terms of scope of project, location, and project cost as the result of projects' preparation stage. The convenience to do this changes is intended to simplify the planning process of external loan projects. However, those changes have to be in line with the outcomes of the program. Those changes will be presented in the annual planning document called Priority Planned External Loans or *Daftar Prioritas Pinjaman Luar Negeri (DRPPLN)*.

Chapter 2

POLICY DIRECTION FOR THE UTILIZATION OF EXTERNAL LOANS

The utilization of external loans are regulated by the Government Regulation number 10/2011 as well as the Decree of Minister for National Development Planning/Head of National Development Planning Agency number 4/2011, and also referring to the RPJMN 2015-2019 and RPPLN 2015-2019.

1.1 Government Regulation Number 10 of 2011

In accordance with Government Regulation Number 10 of 2011 on Procedure for Procurement of External Loans and Receiving Grants, external loans can be utilized for (i) funding of priority activities of line ministries; (ii) on-lending or on-granting to local governments, and/or (iii) on-lending to SOEs. The external loans utilization is addressed in achieving the national development targets as stated in RPJMN. In term of loan volume, it should consider the Maximum Loan Limit as stipulated by Ministry of Finance for the 2015-2019 period.

The planning process for all projects which planned to be financed using the external loans is coordinated by the Ministry of National Development Planning/National Development Planning Agency (Bappenas) based on the proposals submitted by the line ministries, local governments, and SOEs.

Proposed projects that meet the eligible criteria are listed in the List of Medium-Term Planned External Loans or *Daftar Rencana Pinjaman Luar Negeri Jangka Menengah (DRPLN-JM)*. DRPLN-JM is possible to be revised and refined as needed and/or based on the condition of national economy.

1.2 External Loans Utilization Plan (RPPLN) 2015-2019

External loans utilization policy refers to the development financing policy in RPJMN 2015-2019 both macro and micro perspectives of the utilization priorities. At the macro level, the utilization of external loans directed in order: (i) to preserve and maintain the fiscal sustainability, (ii) to improve the performance of the balance of payments, (iii) to be part of the risk management of government debt. Based on that policy, an indication of external loans needed in 2015-2019 accounted for maintaining the debt to GDP ratio below 30 percent.

From the aspect of external loans utilization policy, external loans are directed to support the national development priorities in three dimensions of development in RPJMN 2015-2019: human development dimension, main sector development dimension, territorial and equity dimension. At the micro level, external loan projects are expected to be used for (a) improving the implementation capacity of domestic institutions (transfer of knowledge); (b) encouraging the role and capacity of SOEs and private sectors in national development (investment leverage), and (c) can be used as a model of programs/ projects

expansion with other financing sources (replication). The external loans are also implemented within the development cooperation framework both bilaterally and multilaterally.

The procurement of external loans based on several principles, namely:

- Conducted in a transparent, accountable, efficient and effective, prudence, does not accompany by political ties, and has no charge that can destabilize the security of the state;
- Equality in implementing the cooperations with all development partners; and
- Put national interests as the main priority in all aspects, including political, economic, social, cultural aspects, as well as defense and security.

In addition, the proposed projects to be financed by external loans must have contribution to achieving the national development targets in RPJMN 2015-2019 and fulfill at least one of the following functions:

- Promote economic growth, including projects in terms of (i) enhancement of cooperation involving the private sectors, (ii) the implementation of the Government assignment to SOEs, or (iii) to promote development in the region;
- Increasing the range of access and quality of services to the community; and/ or
- Equitable the results of development in order to reduce disparities between regions.

Chapter 3

DRPLN-JM 2015–2019 REVISION

With the increasing need for funding by the government to financing development programs, the government issued DRPLN-JM 2015-2019 Revision. DRPLN-JM 2015-2019 Revision consists of 37 programs with a loan value of USD 42,273.4 billion. The programs consist of the 118 projects which divided into infrastructure activities (13%) and non-infrastructure activities (87%) (see Chart 1).

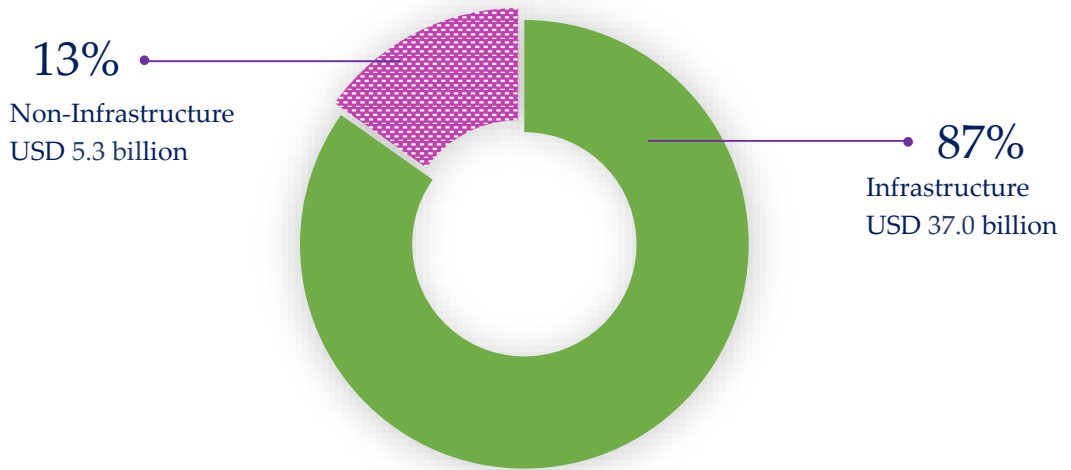

Chart 1. Loan Allocation for Infrastructure and Non-Infrastructure Projects

The recapitulation of the DRPLN-JM 2015-2019 Revision by program and by executing agency can be seen in Table 1 and Table 2, whereas details of the projects of these programs can be seen in Table 3.
